Formweld Fitting Inc.

## **DOUGLAS BROTHERS**

Douglas Brothers provides engineered fabrication for multiple products. Their highly experienced team of estimators, assemblers, and welders can focus on specific engineered needs and a wide range of products. They can manage jobs from local to international and from big to small.

Douglas Brothers

## **WHO WE ARE**

Our company is comprised of three businesses that are focused on serving customers in the stainless steel and specialty alloys for piping and fabrication industries. With facilities in Ontario, Maine and Florida we are strategically set up to service customers for all their piping product needs. Our expertise extends far beyond standard products ( 304L & 316L). It also includes the fabrication of piping products that meets special needs in terms of size, thicknesses and special alloys, such as C276, 625, AL6XN, Duplex 2205 and Super Duplex 2207.
